Education

Shri Madhwa Vadiraja Institute of Technology and Management **Bantakal, Udupi, Karnataka**
B.E. in Computer Science and Engineering *Third Year*

- **CGPA: 9.48**
- Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks, Web Development.

Poornaprajna Pre-University College **Udupi, Karnataka**
Pre-University Course (PUC) *97.67%*

Shanthiniketan, Alevoor **Udupi, Karnataka**
SSLC *99.52%*

Technical Skills

Languages: Java, JavaScript, HTML, CSS, SQL
Web Development: React.js, Node.js, Express.js, EJS, REST APIs, Tailwind CSS, Bootstrap
Databases: MongoDB, MongoDB Atlas, MySQL
Tools: Git, GitHub, VS Code, Vite, Postman
Core Concepts: Data Structures and Algorithms, OOP, CRUD, Authentication, API Development, Responsive Web Design

Projects

EduConnect | *E-Learning Platform* **GitHub** **Live Demo**

- Built an e-learning platform supporting virtual classrooms, assignment tracking, and real-time code execution for Java, Python, and C.
- Implemented full-stack workflows with responsive interfaces, authentication, APIs, and persistent database functionality.

Gully Cricket Manager | *Tournament Management* **GitHub** **Live Demo**

- Developed a web application for organizing local cricket tournaments, teams, players, fixtures, and match scores.
- Implemented team and player management, tournament workflows, match tracking, and persistent data storage.

Parking Slot Management System | *Node.js, Express.js, MySQL, EJS* **GitHub** **Live Demo**

- Developed a parking booking system with authentication, vehicle management, parking slots, payments, booking history, and admin controls.
- Integrated MySQL for structured storage and implemented user and administrative workflows using Node.js and Express.js.

Artisan Marketplace | *E-Commerce Marketplace* **GitHub**

- Built a marketplace for handmade products with buyer and seller workflows, product listings, inventory, orders, cart, and checkout.
- Implemented CRUD operations and user-focused shopping workflows for managing products and orders.

Sorting Visualizer | *HTML, CSS, JavaScript* **GitHub** **Live Demo**

- Built an interactive visualization tool that demonstrates sorting algorithms step-by-step through animated array operations.
- Added adjustable array size and animation speed with a responsive user interface.

SkyCast | *Weather Application* **GitHub**

- Built a responsive weather application providing real-time weather information, city search, hourly forecasts, and weekly forecasts.

Achievements

- Maintained a **9.48 CGPA** in B.E. Computer Science and Engineering.
- Achieved **97.67%** in Pre-University education and **99.52%** in SSLC.
- Completed **150+** days of LeetCode problem-solving practice focused on Data Structures and Algorithms.

Activities

- Participated in an **NSS water conservation activity**, contributing to community-focused environmental initiatives.
- Regularly practice Data Structures and Algorithms through LeetCode and GeeksforGeeks to strengthen algorithmic problem-solving skills.
